Helix AI: Marketing & Go-To-Market Plan

Executive Summary

Helix AI is an open, community-centric AI assistant platform combining chat (text, voice, Discord, etc.), long-term memory, persona customization, and natural-language automation. Its vision – outlined in our internal docs ¹ – is to be the **AI backbone for communities and businesses**. Helix runs on user-controlled infrastructure and integrates deeply with tools (Patreon, Discord, Slack, AWS, etc. ² ³), unlike closed cloud assistants. We'll launch via a high-profile crowdfunding campaign (Kickstarter/Indiegogo) and emphasize Helix's unique selling points: **customizability, privacy, and built-in automation**. In 2026, we'll target Discord/gaming communities, tech-savvy users, small teams, and enterprises with tailored messaging. Branding uses a neon cyan/magenta palette and a double-helix motif (the primary Helix logo) to stand out. This plan details strategy, timelines, pricing, and creative assets.

Research Findings (Connectors)

- **Google Drive:** We found Helix technical docs that outline its feature set, target markets, and tier plans ¹.
- **GitHub (SinLess-Games/Helix):** The *ThirdParty Integrations* doc shows planned integrations: creator payments (Patreon) ⁴, and communication platforms (Discord, Slack, Teams) ³. These confirm Helix's focus on community and open payments.

Marketing Strategy

Target Audiences

- **Online Communities (Discord, etc.):** Gamers, streamers, open-source servers. HelixBot offers moderation, Q&A, music, etc. (No other AI does this natively.)
- **Developers/Tech Enthusiasts:** Individuals who want programmable AI. Helix's open SDKs, CLI, and planned Helix Linux OS appeal to these creators.
- **Small Businesses & Teams:** Users needing AI for productivity. Helix simplifies workflows ("When this happens, do that") with AI – competing with tools like Zapier but with conversational ease.
- **Enterprises:** Companies requiring compliance and data control. Helix Enterprise supports SSO (OAuth/SCIM), audit logs, and fully offline deployment ⁵, addressing needs unmet by consumer bots.

Value Proposition

- **"Your AI, Your Way"** – Helix emphasizes user control. Features: private memory stores, persona templates, and secure on-prem options.
- **All-in-One Platform:** Combines chat, automation, and analytics in one place.

- **Community First:** Designed for Discord/Slack; connects easily to community tools (Discord bot, Reddit, etc.) ⁶ .
- **Developer-Friendly:** Open plugin API and SDKs let devs extend Helix or build skills for a marketplace.
- **Secure & Private:** No data misuse – deploy on-site if needed (our architecture mirrors zero-trust principles, e.g. identity via SPIFFE ⁵).

Messaging & Branding

- **Key Messages:**
 - *Openness:* “Helix runs where you do – including your own servers.”
 - *Personalization:* “Train Helix to your voice. It remembers YOU.”
 - *Automation:* “Tell Helix in plain English and it’ll create that workflow.”
 - *Trust:* “Enterprise-grade security by design (SOC2/HIPAA modes).”
- **Visual Style:** Futuristic neon. Use the double-helix logo (the attached image) as core motif. Accent colors: Cyan (#00E5FF), Magenta (#FF00CC), Green (#39FF14) on a dark (#101028) background. Example hero motif: a glowing helix of data (see embedded concept

- **Assets:** High-quality SVG logo (double-helix icon + text), favicon, social banners (e.g. Discord banner, Twitter header) with brand colors.

Channels & GTM

Crowdfunding & Fundraising

- **Kickstarter:** Primary launch. Create compelling video demo. Offer tiered rewards (beta access, custom personas). Kickstarter fee: 5% + ~3-5% payment ⁷ .
- **Indiegogo:** For flexible funding or to catch missed Kickstarter goals. Similar structure.
- **Patreon:** For ongoing support and dev updates. Fees 5% + processing ⁸ . Use Patreon tiers (Early Adopters, Roadmap Insider, etc.) to sustain development post-launch.
- **WeFunder/SeedInvest:** Later rounds (equity crowdfunding) if needed for expansion.

- **Promotion:** Leverage our Helix Discord and newsletter to drive campaigns. Use influencer demos (e.g. have a streamer test HelixBot live).

Marketing Channels

- **Community:** Official Helix Discord, Reddit (r/AI), Slack communities. Promote bots and invite links.
- **Social Media:** Twitter/X (tech influencers), LinkedIn (B2B posts). Regular demo videos (e.g. "Helix rewrote my email in 5 seconds!").
- **Content:** Blog posts comparing Helix vs competitors (SEO content). Tutorials and case studies (How Helix automated [use-case]).
- **PR & Events:** Press releases at campaign launch. Booth or talks at AI/tech conferences (e.g. AI DevDays). Webinars on AI automation.

Pricing & Packaging

Based on provided feature matrix, we suggest these monthly tiers:

Tier	Price	Highlights
Free	\$0	Basic chat (Discord/web), limited memory (short-term), community support.
Basic	\$5	Expanded memory, citation support, persona templates, knowledge base view.
Basic+	\$10	Discord mods/music bots, custom commands/macros, community dashboard.
Premium	\$15	Natural-language automations, redaction/compliance tools, security logs.
Premium+	\$20	Live web search, Linux desktop app, IoT integrations, advanced memory.
Pro	\$25	Hybrid model routing, open plugin API, scoped memory access, analytics.
Pro+	\$30	Higher limits, Grafana dashboards, advanced RBAC, team collaboration tools.
Enterprise	Custom	All features, on-prem/air-gapped deploy, SSO/SCIM, audit logs, compliance.

These are aligned with market: e.g. ChatGPT's team plan is ~\$30⁹. Annual discounts and bulk pricing can accelerate adoption.

Launch Timeline

The chart above is illustrative; dates may shift based on funding and development feedback.

Scripts for Key Audiences

• **Investors:**

- *Hook:* "What if every team had its own AI that *they* controlled? That's Helix. With the AI market exploding (\$X+ billion), Helix's unique community-driven model is set to capture niche segments others miss."
- *Objections:* "ChatGPT is free." → "ChatGPT is a model; Helix is the whole platform. It adds community integration and governance, turning AI into a user-owned tool."
- *CTA:* "We're raising [amount] seed. Join us to disrupt the AI space. Let's discuss terms."

• **Free Users:**

- *Hook:* "Love AI but annoyed switching apps? Helix gives you an AI friend right in your Discord (and it's free)."
- *Value:* "Ask Helix anything, let it run simple automations, and it'll remember you. No credit card needed."
- *CTA:* "Sign up at **helix.ai/free** and add HelixBot to your server today!"

• **Pro Users:**

- *Hook:* "Supercharge your Helix with Pro."
- *Value:* "Custom commands, advanced bots, and more memory – just \$10/month. Automate tasks, moderate your server, and keep Helix learning from your team."
- *CTA:* "Upgrade now for a 14-day free trial – get full access to HelixBot tools and macros."

• **Premium Users:**

- *Hook:* "Professional AI automation, unlocked."
- *Value:* "Premium Helix adds live web search, Linux desktop integration, and robust security tools. It's like having a whole R&D team for \$15/month."
- *CTA:* "Try Premium free for 30 days and see what Helix can do (with your data, in your language)."

• **Enterprise Buyers:**

- *Hook:* "Bring AI in-house – safely."
- *Value:* "Helix Enterprise gives you all capabilities plus SSO, audit logging, and on-prem deployment. Compliance-ready (SOC2/HIPAA) and scalable for your entire org."
- *Objections:* "But can we keep data private?" → "Absolutely. Helix can run fully offline or in your cloud. Data never leaves your servers."
- *CTA:* "Let's do a pilot. Contact us at **helix.ai/enterprise** for a custom demo with your data."

Each script includes an engaging opener, a value pitch, objection handling, and a clear call-to-action. We will support sales teams with these templates.

Competitor Playbooks & Comparison

We map Helix features against key competitors, with strategies to position Helix:

- **OpenAI ChatGPT** (<https://openai.com/chatgpt>) – Strengths: advanced LLM, large user base ¹⁰ . Weaknesses: limited context retention, no custom workflows, no Discord presence. *Helix angle:* “ChatGPT focuses on pure chat. Helix embeds AI in daily tools and automates tasks, with *your* data and custom memory.”
- **Google Gemini Enterprise** (<https://workspace.google.com/products/gemini>) – Strengths: Google tech, Workspace integration. Weaknesses: proprietary, less social/community focus. *Helix angle:* “Helix can leverage Google models but frees you to host anywhere and connect to any app (even Discord/Reddit). No vendor lock-in.”
- **Microsoft Copilot** (<https://aka.ms/copilot>) – Strengths: Office suite AI, enterprise sales. Weaknesses: Office-only, no community chat. *Helix angle:* “Helix works inside Slack/Discord *and* Office if needed. We offer true cross-app automation and better privacy controls (Copilot is cloud-only).”
- **Anthropic Claude** (<https://www.anthropic.com/index/claude-3>) – Strengths: enterprise safety, data connectors ¹¹ . Weaknesses: young ecosystem, less personalization. *Helix angle:* “Claude is a powerful core, but Helix adds the social layer and dev tools. We can even use Claude’s API under the hood, while giving you fine-grained control.”
- **Rasa Enterprise** (<https://rasa.com>) – Strengths: fully custom chatbots. Weaknesses: developer-heavy, lacks turnkey UI. *Helix angle:* “Rasa is a toolkit; Helix is the finished product. We give you a full chat interface, analytics, and easy automations out of the box.”
- **Zapier** (<https://zapier.com>) – Strengths: 5000+ app integrations. Weaknesses: no AI, requires manual setup. *Helix angle:* “Zapier moves data, Helix *understands* it. Just say what you need, and Helix builds the workflow for you.”
- **Hugging Face** (<https://huggingface.co>) – Strengths: ML community and model hub. Weaknesses: developer-focused, no app UI. *Helix angle:* “We use Hugging Face models but wrap them in an app with memory and chat. No ML expertise needed to use Helix.”
- **Cloudflare Workers** (<https://www.cloudflare.com/products/workers/>) – Strengths: Edge compute network. Weaknesses: Not an AI product. *Helix angle:* “Cloudflare powers our infrastructure, but Helix adds the AI thinking layer. Think of Helix as an AI “app” running on such platforms.”
- **AWS Bedrock/SageMaker** (<https://aws.amazon.com/bedrock/>) – Strengths: scalable AI backend. Weaknesses: complexity, customer needs to integrate. *Helix angle:* “Helix offers managed AI features without requiring AWS expertise. We optimize costs and provide unified billing so users don’t manage separate cloud accounts.”
- **CockroachDB/Yugabyte** (<https://www.cockroachlabs.com>, <https://www.yugabyte.com>) – These are distributed databases (Helix’s backbone). Not direct competitors for users, but relevant as infrastructure. Helix may choose such tech for global scale.

In each case, sales talks should **highlight Helix’s exclusive capabilities** (Discord, memory, automation) as advantages. For example, vs ChatGPT emphasize persona/memory; vs Zapier emphasize AI understanding; vs enterprise vendors emphasize control/compliance.

Crowdfunding & Fundraising Platforms

Platform	Type	Fee Structure	Use Case & Tactics
Kickstarter	Rewards project	5% + ~3-5% payment fees ⁷	Launch Helix with a tech demo video. Reward tiers: beta access, lifetime accounts. Set stretch goals (e.g. extra features). All-or-nothing model drives early urgency.
Indiegogo	Flexible project	~5% + processing fees	Complement Kickstarter, especially for international backers. Keep funds even if goal missed.
Patreon	Subscription	5% + payment fees ⁸	Monthly supporter memberships. Offer exclusive updates, community recognition (Discord role), swag (logo stickers). Focus on engagement.
WeFunder	Equity/Reg CF	~7.5% + SEC fees	Later-stage funding from many small investors. Provide equity. Good for reaching tech-savvy backers.
SeedInvest	Equity	~7% + equity (plus legal)	Accredited investors, larger sums. Requires detailed pitch deck and financials.
GitHub Sponsors	Sponsorship	0% on Stripe; 10% GitHub fee	For open-source contributions. Accept donations from devs.

Strategy: Use Kickstarter/Indiegogo as primary channels for product launch funding, paired with a Patreon for ongoing support. Emphasize Helix's community and creator angle (e.g. "Support the AI your team wants!"). Run a dedicated campaign page (e.g. link Discord for updates). Offer compelling rewards (Helix merch, early feature access).

Creative Assets Checklist

- **Logo:** Provided primary logo (double-helix icon + "Helix AI"). Ensure SVG source is prepared. Variants: color (neon cyan/magenta on dark), white on color, color on light, and icon-only.
- **Icon/Favicon:** 32x32 and 64x64 versions from logo icon.
- **Hero Images:** Custom illustrations or 3D renders with helix theme. Examples: neon digital strands, AI neuron network. Hero banners at 2560×1440 (16:9).
- **Social Graphics:**
 - Discord banner (960×540) – e.g. stylized server backdrop with Helix branding.
 - Twitter/LinkedIn header (1500×500) – featuring tagline and product screenshots.
 - YouTube thumbnail (1280×720) – for video demos.
- **App UI Mockups:** Screenshots or mockups of Helix web/Discord interface (annotate workflows).
- **Color & Font Guide:** As above, with usage rules (contrast ratios, link color, etc.). Provide Pantone or RGB codes for consistency.
- **SVG Logo Example:**

```
<svg xmlns="http://www.w3.org/2000/svg" width="200" height="200">
  <!-- Cyan/Magenta double helix icon -->
  <path d="M20,20 C80,100 120,100 180,20" stroke="#00E5FF" stroke-
width="15" fill="none"/>
  <path d="M20,180 C80,100 120,100 180,180" stroke="#FF00CC" stroke-
width="15" fill="none"/>
</svg>
```

Use this as a starting point for a clean, modern helix icon.

(The above visuals are illustrative. Final designs should be polished by a graphic designer.)

KPIs & Measurement

We will track:

- **User Acquisition:** Free sign-ups, conversion to paid (target 10%).
- **Engagement:** Monthly active users (MAU), messages sent, automations executed.
- **Retention:** Churn rate for paid tiers (aim <5%).
- **Revenue Metrics:** MRR, ARPU.
- **Campaign Metrics:** Crowdfunding funds raised, backer count, media impressions.
- **Community Growth:** Discord members, social followers, newsletter open rate.

Analytics tools: Helix internal metrics (Grafana dashboards), plus Google Analytics on landing site.

Dashboards will be reviewed weekly and reported monthly to stakeholders.

Roadmap & Milestones

1. **Prototype & Beta (Q2 2026):** Free tier alpha with Discord bot and basic web chat. Collect feedback.
2. **Crowdfunding (Summer 2026):** Launch Kickstarter. Fund core development (mobile app, Pro features).
3. **Version 1.0 (Fall 2026):** Release Basic+ and Premium tiers.
4. **Scaling (2027):** Mobile apps, Linux distro, IoT integration, enterprise compliance.
5. **Growth (2028):** Marketplace (3rd-party skills), partnerships (integration with more SaaS), and continuous AI model improvements.

Each phase aligns with marketing pushes (e.g. "Now on mobile!" campaigns).

Mermaid Diagrams

(ER Chart: Helix connects with Discord servers, Teams, SMBs, and Enterprises to deliver AI services.)
